

SPECIAL AUSTERITY PACKAGE

The IRS has published a lot of material in connection with the 0-6-0ST Austerity locos, and a package of this is now being offered at a special price. Included in this package are the following books:-

Continent, Coalfield & Conservation.

This book deals with all the Austerity locos that were built and details their histories.

MOD Locomotives.

This gives details of all MOD locos that were used between 1951 and 1992, including full histories and some photos of the Austerity locos.

Industrial Railway Record 203.

This was a 'Special' edition of the Record that detailed the Austerity locos, and this contains a lot of additional information on these locos; it also includes many photos – both in colour and black & white, showing the locos in operation.

The normal price of the above three publications would be £19.95 {excluding postage}, but these can now be obtained for a discounted price of £16.00. Also included in the package will be a free CD that includes amendment lists for the two books. Free postage and packaging is included in the price.

The Special Offer will be in operation whilst copies of the books are available. Single copies of the books can also be supplied.
